**MEDICAL411, LLC ANNOUNCES THE RELAUNCH OF THE WEBSITE
WWW.MEDICAL411.COM TO PROVIDE SECURE, ONLINE PERSONAL HEALTH RECORDS**

Company Gives Consumers Necessary Tools to Better Manage Health Care

October 26, 2009 – Los Angeles, CA – In an attempt to provide consumers greater control over their medical records, MEDICAL411, LLC has re-launched their website with a web-based application that allows consumers to enter and store their personal health records (PHR) online. One of the primary benefits to having a web-based PHR through MEDICAL411.com is those records are available in the event of an emergency, 24 hours a day, 365 days a year anywhere in the world, with translation services if necessary. Unlike many other PHR companies out there, MEDICAL411.com offers an organized, printable version of your PHR that you can carry around with you at all times or take to routine doctor visits to improve communication between health care providers.

Security

By employing the latest in internet security features, consumers can feel safe that their information is completely secure from unwanted attention. A Secure Socket Layer (SSL) certificate ensures that all data entered on the website is encrypted before it is transmitted to our secure servers. This is the same technology that is used by all major ecommerce websites, including financial institutions for online banking.

Features

MEDICAL411.com allows consumers to store critical information that can not only help improve the quality of health care but also provide peace of mind that this information is with you any time of day wherever you are in the world. Some of the features include:

- Medical and Surgical History – Critical to receiving an accurate diagnosis and proper treatment
- Allergies and Medications List – Avoid potentially life-threatening allergic reactions as well as complications from lapses in medication doses
- Emergency Contacts – Have you loved-ones notified immediately in the event of an emergency
- Special Instructions – Leave behind care instructions if you are a caregiver or have pets

- Document Storage – Upload file copies of critical legal documents that can be made available in the event of an emergency, including Power of Attorney, Do Not Resuscitate (DNR), Living Will, Family Trust
- Medication Reconciliation – Printable report that summarizes all medications to assist in improving communication between multiple health care providers and avoid potentially life-threatening drug interactions
- Personal Health Record – Printable report that provides a consolidated and organized view of medical records, designed to be easily and quickly understood by health care professionals

About MEDICAL411, LLC

MEDICAL411, LLC was created through collaboration between Emergency Physicians, Medical Specialists and Hospitalists, Registered Nurses, LVN's, Paramedics, EMT's, Sheriff Deputies, Hospital and Emergency Directors, Information Specialists, Hospital Admission Coordinators, Medical Social Workers, patients and their families.

Our Mission is to provide our value-added service as a supplement to existing health and wellness programs by reducing healthcare costs, empowering end-user health management and improving communication between healthcare entities through the integration of our highly skilled staff and advanced technology to provide personal attention and critical medical information on-demand at any hour throughout the world.
